DISCRIMINATION PROHIBITED: Under provisions of applicable public laws enacted by Congress since 1964, no person in the United States shall, on the ground of race, color, national origin, sex, or handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. In addition, Executive Order 11141 prohibits discrimination on the basis of age by contractors and subcontractors in the performance of Federal contracts. Therefore, the National Institutes of Health grants and awards program, like every program or activity receiving financial assistance from the Department of Health, Education, and Welfare, must be operated in compliance with these laws and executive order.

PREFACE

The mission of the National Institutes of Health is to protect and improve the health of the American people. To achieve this goal, NIH conducts biomedical research in its own laboratories; provides grants to nonprofit organizations and academic institutions for research; provides grants for the training of research investigators; supports biomedical communications through programs and activities of the National Library of Medicine; and provides grants for facilities and other resources required for cancer research. In addition, the research contract mechanism is used under appropriate circumstances.

Listings of NIH grants and research and development contracts are prepared annually by the Division of Research Grants. This book presents a listing of the research grants (including the research career development awards) awarded by NIH from fiscal year 1979 funds. Research grants awarded by other constituent agencies of the Public Health Service are not included in this volume.

TECHNICAL NOTE

Cancer Control Grants

The research demonstration and dissemination projects of the National Cancer Institute are no longer being included in this volume for the sake of conformity with their treatment in the budgetary process. These grants, commonly referred to as cancer control grants, are shown separately from research grants in the budget, and their exclusion from this volume reflects their treatment generally in analytical studies. Accordingly, the cancer control grants will be shown as a separate table in another volume of this series.

Organization Identification

In the presentation of grants made from fiscal year 1979 funds, emphasis is placed on listing the organizations in the city and State of the unit in which professional responsibility of the principal investigator lies. Study of the structure of grantee organizations in the United States (primarily universities and colleges, and State Departments of Mental Health or their equivalents) has led to the following qualifications in the listing of their names:

1. Within a given city, if an institution of higher education is comprised of two or more campuses reporting directly to the central administration, each campus is listed separately.
2. In the listing of governmental organizations, Federal as well as non-Federal, the name of the parent department precedes that of the individual component, and the organization is listed as many times within a given city as there are components of the organization receiving grants.
3. If a foundation has been established for the purpose of receiving and administering funds for grants, the name and location of the organization having professional responsibility for the grant are shown rather than the name and location of the foundation. The name of the foundation is indicated in the Appendix if it differs materially from the name of the organization.
4. If an association receiving a grant has a fixed national headquarters, the grants are listed at the headquarters location. If however, the association does not have a fixed headquarters, the grants are listed in the city shown for this organization in either the Encyclopedia of Associations (1) or the Research Centers Directory (2).

These qualifications do not apply to foreign institutions or to some domestic organizations, because a systematic study of their organizational structure has not been made. Organizations which require a clarifying comment, or which appear in more than one geographical location are listed alphabetically in the Appendix.

Supplemental Awards

In this publication, supplemental awards are combined with the parent grant, or with other supplements, when both awards are made from the same fiscal year funds. Supplemental grants awarded in fiscal year 1979 to parent grants awarded in a previous fiscal year are shown separately; if two or more such supplements were made during fiscal year 1979, these supplements are combined.

ABBREVIATIONS

The NIH component supporting a grant is indicated by the code letters in the left-hand column. These code letters form part of the identification of the grant number.

DISCRIMINATION PROHIBITED: Under provisions of applicable public laws enacted by Congress since 1964, no person in the United States shall, on the ground of race, color, national origin, sex, or handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. In addition, Executive Order 11141 prohibits discrimination on the basis of age by contractors and subcontractors in the performance of Federal contracts. Therefore, the National Institutes of Health grants and awards program, like every program or activity receiving financial assistance from the Department of Health, Education, and Welfare, must be operated in compliance with these laws and executive order.

PREFACE

The mission of the National Institutes of Health is to protect and improve the health of the American people. To achieve this goal, NIH conducts biomedical research in its own laboratories; provides grants to nonprofit organizations and academic institutions for research; provides grants for the training of research investigators; supports biomedical communications through programs and activities of the National Library of Medicine; and provides grants for facilities and other resources required for cancer research. In addition, the contract mechanism is used under appropriate circumstances.

Listings of NIH grants and research and development contracts are prepared annually by the Division of Research Grants. This book presents the fellowships, training grants, cancer research facilities construction, cancer control, and medical library grants awarded by the National Institutes of Health from fiscal year 1979 funds. Awards for training and construction made by other constituent agencies of the Public Health Service are not included in this volume.

TECHNICAL NOTE

Cancer Control Grants

The research demonstration and dissemination projects of the National Cancer Institute, formerly presented in the volume listing NIH Research Grants, are being shown in this volume effective with fiscal year 1978 funds. These grants, commonly referred to as cancer control grants, are shown separately from research grants in the budget, and their exclusion from the volume on research grants was for the purpose of conforming with their treatment in the budgetary process. To reflect their uniqueness, the cancer control grants are shown in a separate table in this volume.

Organization Identification

In the presentation of grants made from fiscal year 1979 funds, emphasis is placed on listing the organizations in the city and State of the unit in which professional responsibility of the principal investigator lies. Study of the structure of grantee organizations in the United States (primarily universities and colleges, and State Departments of Mental Health or their equivalents) has led to the following qualifications in the listing of their names:

1. Within a given city, if an institution of higher education is comprised of two or more campuses reporting directly to the central administration, each campus is listed separately.
2. In the listing of governmental organizations, Federal as well as non-Federal, the name of the parent department precedes that of the individual component, and the organization is listed as many times within a given city as there are components of the organization receiving grants.
3. If a foundation has been established for the purpose of receiving and administering funds for grants, the name and location of the organization having professional responsibility for the grant are shown rather than the name and location of the foundation. The name of the foundation is indicated in the Appendix if it differs materially from the name of the organization.
4. If an association receiving a grant has a fixed national headquarters, the grants are listed at the headquarters location. If however, the association does not have a fixed headquarters, the grants are listed in the city shown for this organization in either the Encyclopedia of Associations (1) or the Research Centers Directory (2).

These qualifications do not apply to foreign institutions or to some domestic organizations, because a systematic study of their organizational structure has not been made. Organizations which require a clarifying comment, or which appear in more than one geographical location are listed alphabetically in the Appendix.

Supplemental Awards

In this publication, supplemental awards are combined with the parent grant, or with other supplements, when both awards are made from the same fiscal year funds. Supplemental grants awarded in fiscal year 1979 to parent grants awarded in a previous fiscal year are shown separately; if two or more such supplements were made during fiscal year 1979, these supplements are combined.
